What ver.di demands from Deutsche Post AG:

- **15 % pay increase**
- **200 euros more per month for apprentices and dual students**
- **12-month term**

We want to negotiate a continuation of the special payment for 'Beamt*innen' at Deutsche Post AG.

NECESSARY:

The 15% demand is absolutely necessary in the current situation. In October 2022, the average rate of inflation for all households reached 10.4%. People on low incomes are even more affected. The figures prove what we notice every time we go shopping, stand at the petrol pump or when the next bill comes in: we need more money in our pockets!

FAIR:

Our demand is also fair. In 2021, Deutsche Post DHL Group made a record profit of €8 billion. In 2022, it's looking even better. Without your

work, these profits would not arise. Therefore, it's only fair that we get a share of the company's success.

POSSIBLE:

ver.di is a strong union. No employer will raise wages voluntarily, but if we stand united, we can do it! These demands can be pushed through.

What can I do?

We need as many people as possible to support the demand. Talk to your colleagues and convince them of our arguments and to become a ver.di member.

If you're not yet a member, now's the time!
